WELCOME TO IASTAM AND DPSRU

It gives us a great pleasure to invite you to the first Pharmacy University of India: Delhi Pharmaceutical Sciences and Research University, to the International Conference on "Challenges for Global Competitiveness of AYUSH and Natural Products" and IASTAM Oration and Award function 2018. IASTAM (Indian Association for the Study of Traditional Asian Medicine) is committed to global healthcare to bridge the gaps of challenges in different dimensions through Asian medicine including AYUSH.

One of the major challenges in *Ayurvedic, Unani, Siddha* and Homeopathy medicine is global competitiveness and acceptance. The theme is to deliberate on these challenges and to come out with reports giving strategies that can be taken up by the University and submitted to authorities and policy makers in the Government for promotion of AYUSH herbal medicines. Thus, the aim of the conference is to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and researches about the scientific research work done in different disciplines related to pharmaceutical sciences and Ayurvedic medicine. India, with its rich biodiversity and millennia old traditional medicine system of Ayurveda, offers a unique opportunity to undertake rationalized drug discovery program based on herbal drugs for the benefit of mankind.

Delhi Pharmaceutical Sciences and Research University (DPSRU), is the first Pharmacy University of India, established by the Delhi Legislative Act of 2008, and functional from 2015. It is approved by the UGC under section 22 and currently runs 4 undergraduate and 15 post graduate programmes in addition to three diploma and Ph.D. in different disciplines of pharmaceutical and allied sciences such as sports pharmacy and physiotherapy with current intake sanction of 1230 mentored by 143 faculties and non-teaching staff. Although DPSRU is just two-year-old University, it has a strong legacy of 53 years in the form of College of Pharmacy (1964), institute popularly known as DIPSAR with various centers of excellence including Ocular Pharmacology Lab., Pharmacovigilance Centre, Drugs and Poison Information Centre and Centre for Clinical Trials (BA/BE studies). The University is equipped with over 50 labs, CPCSEA approved three floor animal house, medicinal garden, sports complex, gymnasium and swimming pool. There are 3 hostels, guest house and staff residence complex.

One of the niche areas of research at DPSRU has been development of herbal formulation notably for glaucoma and retinal protection for which the Institute has 26 patents, out of which many are US /PCT patents. The University plans to take a lead in development of suitable courses to promote AYUSH/Natural Products.

Indian Association for the Study of Traditional Asian Medicine - IASTAM India is the multidisciplinary organization that pioneered intellectual conclaves and has been active for over 36 years organizing events at international & national level on subjects of significance. With the new theme 'Connecting Systems, Bridging Disciplines' it is now committed to global healthcare with efforts to bridge the gaps of challenges with different dimensions.

IASTAM has nurtured a unique 'Aspiring tradition' since 1990 that encourages learning, growing and aspiring new comers in the organization adhering to the path and capable of achievements. IASTAM has instituted 3 IASTAM Orations (one to Non- Indian Citizen and one to Indian Citizen) and 9 IASTAM Awards to recognize excellence. To encourage cross faculty activities, 3 National Scholar Awards and 3 Research Scholar Awards are also given to young faculty and students. This provides an opportunity to interact with the best of experts. The current event is the IX series of IASTAM Oration and Award Function 2018. It is being organized in different parts of the countries as in GAU, Jamnagar (2015), with ICAAM, Pune (2016) and IMS, BHU, Varanasi (2017) and now in Delhi for the second time after 2003 (at Hotel Taj Mahal in collaboration with ADMA).

We look forward to stakeholders of Traditional Systems of Medicine to participate in deliberations and interact with IASTAM awardees as well as distinguished speakers drawn from India and other countries. We also take this opportunity to encourage young investigators for presentation of their research findings. The organizing committee has planned to give away various prizes for the best presentations in oral as well as poster sessions.

Looking forward to the active participation.
